Please amend Claims 1, 5, and 9 as follows:

1. (Amended) A helical scan transport apparatus for reading and writing data on to a magnetic recording tape which is wound on a supply reel rotatably mounted within a removable tape cartridge, wherein the tape has a leader block attached to one end for use in withdrawing the end from the tape cartridge, the transport comprising:

a chassis having a front end portion and a rear end portion;

an elevator assembly mounted on said chassis at said front end, said elevator assembly configured to receive the tape cartridge and to position the tape cartridge in a loaded position;

a take-up reel assembly coupled to said chassis at said rear end portion;

a helical deck mounted on a central portion of said chassis between said elevator assembly and said take-up reel assembly, said helical deck including a rotary read/write head, a substantially linear tape loading path between said elevator assembly and said take-up reel assembly, and a movable guide for seizing the tape from said tape loading path and for at least partially wrapping the tape around said rotary head; and
